

PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in SQL-based ERP data extraction, data management, ETL, data validation, Python automation, Power BI/Tableau dashboarding, and business analytics. Experienced in processing and validating large datasets, automating customer-data workflows, analyzing trade and market data, and developing KPI reports for business decision-making. Strong foundation in data quality, analytical problem-solving, reporting automation, and AI/automation tools, with a focus on accurate, actionable insights.

SKILLS

- Data Analytics:** SQL (MySQL), Python (Pandas), Exploratory Data Analysis, Data Cleaning, Data Validation, Data Quality, ETL, Data Transformation, Data Management
- Business Intelligence:** Power BI, Tableau, DAX, Power Query, KPI Dashboards, MIS Reporting, WBR Reporting, Data Visualization
- Automation:** Python Automation, VBA Macros, Advanced Excel, Power Query, Reporting Automation
- Database & Data Processing:** ERP Data Extraction, Data Reconciliation, Data Deduplication, Data Standardization, Customer Data Management
- Analysis:** Trend Analysis, Variance Analysis, KPI/SLA Analysis, Market & Trade Data Analysis, Business Insights, Decision Support
- AI & Emerging Technologies:** Generative AI, AI Automation, Agentic AI, n8n
- Tools:** MySQL, Microsoft Excel, Microsoft Power BI, Tableau, Microsoft Office.

EXPERIENCE

Data Analyst, Description:	Texcoms Worldwide June 2025 –Present
- Use SQL in Heidi to extract and analyse ERP data from Smart Trade for Sales and Sourcing requirements, covering enquiries, sales, sourcing, confirmed, cancelled, and yet-to-confirm transactions. - Prepare weekly, monthly, and annual datasets and validate, cleanse, transform, and reconcile data using SQL, Excel, Power Query, and Python to improve accuracy and reliability. - Develop and maintain Power BI and Tableau dashboards for Weekly Business Reviews (WBR) and monthly IDM meetings, enabling management to monitor KPIs and make data-driven decisions. - Analyse Sales and Sourcing metrics, KPIs, and performance trends; identify variances and provide actionable insights for management review. - Build and maintain customer databases from trade data and automate data cleaning, deduplication, and processing using Python (Pandas). - Collect and analyse trade and market data from paid third-party sources to identify market trends, customer opportunities, and potential business prospects. - Perform ETL workflows using Python and Power Query, including extraction, transformation, validation, deduplication, and standardization before reporting and dashboard development. - Translate management questions and reporting needs into data requirements, analytical outputs, dashboards, and ad-hoc reports for business decision support. - Automate recurring data-processing and reporting activities using Python, VBA, and Advanced Excel to improve reporting efficiency.	

PROJECT WORKS

Python-Based Customer & Company Contact Data Automation | Texcoms Worldwide

- Developed a Python automation workflow to process company-level trade data and build a structured customer/contact database.
- Automated data cleaning and deduplication using Pandas, including standardization of company records before enrichment.
- Integrated multiple web and structured-data sources to identify company websites, contact persons, phone numbers, email addresses, and addresses.
- Implemented source-weighted scoring, website verification, confidence classification, and source-URL tracking to improve data reliability.
- Generated standardized Excel outputs with processing summaries and confidence indicators for Sales/Sourcing business use.

FIFA World Cup MIS Reporting Dashboard | Power BI

- Extracted and transformed historical datasets using Excel Power Query; cleaned duplicates, missing values, and inconsistent formats.
- Developed an interactive Power BI MIS dashboard with KPI tracking, DAX measures, calculated columns, and performance trend analysis.
- Implemented data modelling and relationships across multiple datasets to support accurate KPI reporting and analysis.
- Created WBR-style reporting views to monitor performance, trends, and tournament-wise variances.

EDUCATION

Master of Science in Computer Science CGPA: 8.3/10 PSGR Krishnammal College for Women	2023 - 2025 Coimbatore, India
Bachelor of Science in Computer Science CGPA: 8.1/10 Vivekanandha College of Arts & Science	2020 - 2023 Tiruchengode, India

CERTIFICATIONS

- **Microsoft Power BI Data Analyst Associate (PL-300)**

Microsoft
Issued: December 2025 | Expires: December 2026
Credential ID: A7260141A79D26F1
Credential URL: [Link](#)
- **Complete AI Automation and Agentic AI Bootcamp with n8n**

Udemy
Instructors: KRISHAI Technologies Private Limited, Mayank Aggarwal
Completed: December 2025
Certificate ID: UC-9713a5d7-450f-458c-ac0f-2155ead4a12b
Certificate URL: [Link](#)
- **Capstone: Retrieving, Processing, and Visualizing Data with Python**

Coursera (University of Michigan)
Completed: December 2023
Verification URL: [Link](#)
- **LibreOffice Suite Base Training**

IIT Bombay (Spoken Tutorial Project)
Completed: April 2025
Credits: 2 | Score: 62.5%
Conducted at: PSGR Krishnammal College for Women
